

FREE HEARING AIDS*

**Improve your hearing
and help us discover
new treatments
for hearing loss.**

We are looking for an additional 300 West Australians to participate in our world-first clinical trial at Ear Science Institute Australia.

If you are:

- **Over 69 years of age**
- **A fluent English speaker**
- **Experiencing hearing loss in both ears, and**
- **Interested in trying hearing aids for the first time.**

We would love to hear from you. We are seeking participants for our research study that investigates whether hearing aids to correct hearing loss can also improve memory skills in older adults.

***If you qualify for this study, we will fit you with a pair of hearing aids (to keep) and run a series of hearing & memory tests over two years (total commitment of approx. 10 hours).**

**Contact Dr Dona Jayakody and the HearCog team
at Ear Science Institute Australia to find out more.**
