

# BIMODAL HEARING SOLUTION

Hearing aids & cochlear implants work together to offer a bimodal hearing solution

- A more natural, smoother sound quality
- Better environmental awareness through improved localisation & balance
- Improved clarity and speech understanding, especially in noise
- A richer musical experience
- Improved ease of communication over the phone
- Merging of electric and acoustic sound on a central level, resulting in an overall better listening experience

A bimodal solution = enhancing your overall ease and quality of communication
